Keeping Calm, Promoting Evidence

The impact of this novel coronavirus continues to grow, and the stress on everyone working in the medical field can be overwhelming. During this time, we must continue to stand together and support one another. As you're asked to practice during this crisis and as your family, friends, patients, and the public ask you for information, one way to help is to use and promote evidence-based medicine. This weekly roundup of COVID-19 resources will help you find — and share — the credible medical information you need.

Thank you for your service, and stay safe.

The latest from Lippincott® Journals

[Loss of Smell as an Early Symptom of COVID-19: What Research Is Uncovering](#)

Basic scientists and clinical researchers have geared up to try to quantify the extent of anosmia among COVID-19 patients and to understand what, at the cellular level, may explain the coronavirus' possible assault on the olfactory system
