## COVID-19 Vaccine Will Be Approved And Rejected By Anti-vaxxers

*Disclaimer: This post is from GomerBlog, a satirical site about healthcare.*

ATLANTA, GA – Officials at the Centers for Disease Control & Prevention (CDC) announced today that they believe the new vaccine currently under development aimed at controlling the rapidly spreading SARS-CoV-2 virus – responsible for causing COVID-19 – will be approved and ready to be utterly rejected by those in the anti-vaccination (anti-vax) movement and early as 2021.

*“This is an exciting development,” said Dr. Eric Polsky, director of the CDC’s Novel Vaccination Department, “and we will work tirelessly to ensure all anti-vaxxers have the opportunity to decline, refuse, and reject this potentially life-saving vaccine as early as possible.”*
